

ALINA LIGHTING SOLUTIONS

LED LAMPS & BULBS CATALOG

OUR MISSION

Transform the way people experience light.

We strive to create positive experiences for individuals and communities across all industries through the power of good lighting products and design. Whether it's designing lighting solutions for residential spaces, schools, sports facilities, healthcare centers, or other environments, we strive to enhance people's lives and well-being by creating optimal lighting conditions that promote productivity, comfort, and a sense of connection with the surrounding environment.

By prioritizing innovation, sustainability, and collaboration with our clients, we aim to lead the industry in delivering exceptional lighting experiences that exceed expectations and foster a brighter future for all.

OUR PRODUCTS

- Innovating Trust – By offering a 3/5/10-year warranty on our standard products, our customers know they are getting a quality product.
- Innovating Technology – Alina Lighting Solutions is constantly developing newer and more efficient solutions.
- Innovating Service – Most of our products are shipped within three business days.
- Innovating Safety – All lights are compliant to the highest safety standards.
- Innovating Design – We offer custom lights to meet your needs.

OUR SERVICES

We work with our customers to ensure that our products meet the needs of their installation by providing a full range of complimentary services, including:

- Lighting layouts
- Utility rebate assistance
- Lifetime product support
- Facility audits
- ROI calculations

ALINA LIGHTING SOLUTIONS

Alina Lighting LED lamps & bulbs are ideal for replacing high-powered incandescent bulbs and lower wattage HID lamps or fluorescent bulbs, as well as in new project applications.

The ENERGY efficient Alina lamps consume approximately 85 % less energy than their incandescent counterparts and come in dimmable and non-dimmable versions to suit a wide variety of residential and commercial applications.

ENERGY SAVINGS

Alina Lighting LED bulbs offer optimal energy-savings - up to 80% compared to legacy equivalents.

Trusted performance.

Alina Lighting LED bulbs feature long life and offer a wide range of wattage and lumen outputs, a variety of color temperature choices, and up to a 90 CRI for most types.

Variety of bulb applications.

Alina Lighting LED bulbs provide energy-efficient lighting solutions for a wide variety of fixture applications.

Environmentally friendly.

Alina Lighting LED bulbs are RoHS compliant, which means they are made according to stringent environmental regulations.

WHAT IS COLOR TEMPERATURE?

Color temperature (Correlated Color Temperature or CCT) is essentially a gauge of how yellow or blue the color of light emitted from a light bulb appears. It's measured in the Kelvin unit and is most found between 2200 Kelvin degrees and 6500 Kelvin degrees.

For most residential applications, 2700K and 3000K are preferred color temperature options as they both create a nice, warm appearance that creates an inviting and relaxing environment.

For retail or commercial applications, 4000K is a popular color option as it provides for a crisper, more energetic shade of white. For industrial or task-oriented applications, 5000K or even 6500K is a preferred color option, as these color temperatures best match natural daylight.

WHAT IS CRI, OR COLOR RENDERING INDEX?

The CRI value of a light source describes how accurately a light source illuminates colors of an object. It is scored on a scale with 100 being the best. Most standard bulbs have a CRI value of 80, while high CRI bulbs have a CRI value of 90 or higher.

For example, a painting shown under a 70 CRI light source may exhibit colors that don't appear correct, or accurate. When seen under a 95 CRI light source, however, the colors of the painting will likely look accurate and natural.

LED WATERPROOF CORN LIGHT

PRODUCT FEATURES

- Unique structure design, disconnect-type design of power supply and light source, easier for power supply and light source changing if needed.
- Using die casing aluminum heat sinking and active air exchanging cooling system which speed up heat spreading.
- Widely used, no need of ballast, easy installation. Complies with the standards of TUV and ETL well.
- Not applicable for dimmers, electronic switches and remote controls.
- If used in sealed lamp fixtures it will reduce the lumen flux and working life. We don't suggest to use it in the sealed fixture, especially for high power light of more than 60w. if over 80w, don't install in a sealed fixtures.
- Mainly used in workplaces, supermarkets, garden for public places lighting.

INSTALLATION AND MAINTENANCE

- Directly connect with wire AC85-300V wires.
- If you want to replace the traditional fluorescent lights, please ensure you are using the correct socket which fits the lamp perfectly. Ensure that the input voltage and the lamp is matched. Make sure that the lamp base will hold three times the net weight of the lamp.
- Make sure the products are installed tightly on the fixture, then plug in and turn on the light.
- If smoke and/or peculiar smell occurs, it may lead to electric shock or fire accident. Please cut off the power supply quickly and contact the maintenance personnel. Please do not disassemble it by yourself to avoid the electric shock accident.
- Please do not replace parts at random to avoid accidents of lamp damage, falling, electric shock, catching fire etc.
- Please use dry cloth to clean it. Please do not use volatile matters such as paint thinner and gas to clean the surface of the lamps. Please do not spray pesticides onto the lights. Otherwise, it may lead to discoloration or damage of the lights.

THE EXPLOSION FIGURE

PAY ATTENTION

When the products are used for outdoor lighting, please take measures with adequate ventilation. Please pay attention to the size of the confined space. Let the lamp have enough space for heat dissipation for the lumen maintenance and extended working life.

LED PL HORIZONTAL LAMP TYPE A

PRODUCT FEATURES

- 6" Can suitable and 26watt CFL equivalent
- 80+ CRI
- High power factor >0.9 L 70 life 50 ,000 hours
- Rotatable 180° (Horizontal model) Die casting Aluminum heat sink
- Operating Temperature -4 to 105 degrees.
- UL damp listed.
- Do not use for totally enclosed fixtures
- The units are intended to retrofit Type IC or non-IC recessed mount listed luminaries 5 years limited warranty
- Universal G24q 4-pin base can retrofits G24q-1,G24q-2,G24q-3,GX24q-1,GX24q-2 and GX24q-3.

SAFETY FEATURE

Built-in Thermal Detector support lamp cut off the power from over driven of incompatible electrical ballast.

INSTRUCTION

Type A plug in LED PL retrofit lamps only work with electronic ballast and no need to bypass.
They will be replacement for CFL bulbs in variety existing lamp installation of commercial applications.

LED PL HORIZONTAL LAMP TYPE A

ORDERING NUMBER LOGIC

Typical order example: 12 PL03HG24Q LED27

Model Number	Power (lamp only)	Lumen output	Base	Version	CCT	Voltage	Suitable Location	Beam Angle	Control
12 PL03HG24QLED27	12W Max	900 Lm	G24Q	Horizontal	2700K	Driven by CFL Ballast	Dry and Damp	140°	Non-Dimming
12 PL03HG24QLED30		1000 Lm			3000K				
12 PL03HG24QLED35		1100 Lm			3500K

Unit: inch

LED PL VERTICAL RETROFIT LAMP TYPE A

PRODUCT FEATURES

- 80+ CRI
- Die casting Aluminum heat sink
- Operating Temperature -4 to 105 degrees.
- UL damp listed.
- Not use for totally enclosed fixtures
- The units are intended to retrofit Type IC or non-IC recessed mount listed luminaires 5 years limited warranty
- Universal G24q 4-pin base can retrofits G24q-1,G24q-2,G24q-3,GX24q-1,GX24q-2 and GX24q-3.

INSTRUCTION

- Type A plug in LED PL retrofit lamps only work with electronic ballast and no need to bypass.
- 12-Watt LED PL Vertical retrofit lamp G24q base will be replacement for CFL bulbs in a variety existing lamp installations of commercial applications.
